#### Offense Reported: Cruelty to Animals

##### Investigation:

At 8:36 pm on 7-12-12, I, Deputy J. Deason #1171 arrived at 836 Cottle Town Rd in reference to a cruelty to Animals complaint. I met with Judy Santerre. She advised she has had ongoing issue with her neighbor, Hugh Collier. She advised that Hugh has been shocking her white Palomino Horse with a cattle prod. She advised she filed a report using case #12-S-018356 in May of 2012 In reference to the neighbor possibly using a cattle prod to burn her horse, at that time she did not want to pursue charges. She showed pictures of the previous incident, and advised she would take more if needed. I viewed the previous pictures where I observed some type of burn marks on the Horse's right buttocks. Judy advised that there was a second burn similar to the first one on the right buttocks near the first one. She contacted a local Veterinarian who advised the injury looked consistent with a cattle prod.

She believes the new burn occurred on Saturday 7-7-12. She observed the neighbor and his father leaving their property on said Saturday as well. Their property is adjacent to hers and they share a barbed wire fence on the property line. She believes it is her neighbor since she has had ongoing issues with him and because her horse has caused damage to the fence. Judy wished to pursue charges. I did not have access to the horse at the time, so no pictures were taken.

**Date of Offense: 07/07/2012 - 07/12/2012**

**Report Date: 07/25/2012 9:25 AM**

---

On 07/25/12, at approx 0925 hrs, I went to 836 Cottle Town Rd. and met w/ Santerre. Santerre took me to her horse pen, to where she showed me the Palamino gelding, that she is saying that was "injured" by Collier. I conducted an examination of the "puncture wound" that she stated that was caused by some type of sharpened stick. I found that there was indeed some type of wound that existed, however, the wound was almost completely healed. The wound was approx. dime sized in circumference, which included the extra granular tissue w/ a "B- B " sized scab. The cattle prod marks were non existant.

I did observe that there was numerous small scratches w/ fresh blood present on both this horse and also the sorrel mare, that Santerre owns. It should be noted that Santerre's pasture contains assorted sized trees and a vast amount of underbrush. Santerre stated that she is going to relocate her horses, fearing that Collier may inflict more damage. I asked her about why she thought that Collier would injure her horses, she said that because she would not go out, on a date w/ him.

Santerre stated that her homeowners insurance had paid a \$700+ claim that Collier had recieved for fence damage to the fence between their properties, in March of this year. She stated that Dr. Weiss DVM, Bastrop Vet Clinic had treated the Palamino for his "injuries".

After departing from Santerre, I spoke w/ Dr. Weiss, via phone. Dr. Weiss stated that he had not treated the horse for the cattle prod marks. He stated that Santerre had sent him pictures (via phone) of the Palamino and had asked, "if a cattle prod could have caused the injuries". Dr. Weiss stated that he had told her that it was possible but, that her horse would have probably moved away before a "burn" like this would have occurred. He further stated that Santerre had brought the Palamino to him for examination and, that the wound was almost healed. He said that he had told her that it was some type of puncture wound and that no foreign object(s) was still inside of the wound. Dr. Weiss also stated that he had also told Santerre that he could not tell her the cause of the wound.

#### Investigation:

On 06-01-12 I, Deputy A. Crim #939 was dispatched to meet with a complainant in the front lobby of the sheriff's office. Upon arrival I met with the complainant and identified her as Judy Santerre.

Judy advised that she resides at 836 Cottletown Rd. and has a neighbor whom she identified as Hugh Collier who resides at the adjacent property, 860 Cottletown Rd. Judy stated that approximately two years ago Hugh's wife passed away, and he has been a "terror" ever since then. Judy stated that approximately two monthes ago Hugh approached her and asked her "to go out on a date with him". Judy advised that she denied Hugh's request and he has been upset with her ever since.

Judy stated that since the incident, Hugh has approached her and expressed that he is unhappy because her horse puts it's head over her fence, reaching onto his property and eats grass. Judy admitted that the top wire on her fence was a little loose so she is going to have it replaced, but has not done so at this time. Judy advised that last tuesday evening (05-29-12) she noticed a spot on the right back rear end of her horse, where the hair appeared to be "singed" and falling off. Judy stated that in her expierence with horses, she believes the spot is from the horse being "hot shotted" with a livestock tool which is used to shock the animal. Judy then provided me with a photograph of the injury and advised that she took the photo the following day (05-30-12). I then observed the photograph of what appeared to be a white horse and noticed that the hair did appear to be shedding off.

I then asked Judy if she actually witnessed Hugh cause injury to the horse, she advised that she had not. Judy stated that she only believed Hugh was responsible because of his anger towards her. I then asked Judy if she wished to file a criminal offense report to have the incident investigated, she advised that she did not. Judy stated that she is scared of Hugh and stated that she did not want anyone to contact him or wish for him to know that the report was generated. Judy advised that she only wanted for an information report to be generated to document the incident. I then provided Judy with a Bastrop County Sheriff's Office business card stating my name and the case number and advised her an information report would be generated. Judy then left the scene.

I returned to the patrol room located inside of the sheriff's office and placed the photograph I had obtained from Judy, into a large manilla envelope to later be attatched to a copy of this report. Upon completion of this assignment, I returned to regular patrol.

### Narrative Report

**Case Number: 14-S-003542**

**Date of Offense: 07/22/2014**

**Nature of Call: Cruelty To Animals**

**Reporting Officer: Tucker, Jr**

**Report Date: 07/22/2014 11:51 AM**

---

In the last week of June 2014, I was contacted by a subject ID'd as:

Santerre , Judy  
W/F , 836 Cottletown Rd

in ref: Cruelty To Animals

I met w/ Santerre at the Sheriffs Office and at which time she stated that on 09/20/13 she returned home from work and found that her horse was wounded. Santerre stated that had the Bastrop Vet respond to her residence for treatment purposes. She also stated that later on, the horse went to the Bastrop Vet Hospital and when she was not happy with their treatment, she took the horse to the Elgin Vet Hospital, who according to Santerre, they referred her to Tx A&M for treatment. Santerre said that the end result was that the horse had to be euthanized on 04/24/14.

Santerre described her horse as ;

10 year old, Palamino Quarterhorse  
named " Harvey"

Santerre stated that she believes that her neighbor, ID'd as:

Collier , Hugh  
860 Cottletown Rd

" cut" her horse, with an unk. instrument( possibly some type of knife) by reaching through the fence and causing injury to the right front fetlock area.( See photos provided by Santerre) Santerre stated that on 09/22/13, that Collier drove by her residence, rolled down his vehicle window and went " Ha Ha Ha". It should be noted that there has been an ongoing issues between Collier & Santerre, See BCSO Case#s 12-S-018356 & 12-S-021160.

At the end of our conversation, I advised Santerre to contact the Bastrop Vet, Elgin Vet & Tx A&M in order to release their reports for this investigation. Later, I spoke, via phone, with DVM Darren Weiss, at the Bastrop Vet. Dr. Weiss pulled the notes that were written by DVM Mosely, who originally treated Santerre's horse. According to the notes, Dr. Weiss advised that there were several "wire cuts" on the shoulders, chest, ribcage & both rear legs, indicating that this horse had gotten "hung up" in an unknown type of wire fence.

After receiving the additional "Vet Reports", it appears that the horse developed some secondary infections that resulted in the deterioration and rotation of the right front coffin bone, that eventually began to protrude through the sole area of the hoof. This event is what resulted in the euthanasia of the horse, even after extensive treatment at all of the aforementioned Veterinarian Providers.

On 07/17/14, I met with District Attorney Bryan Goertz, to review this case. DA Goertz stated that based on the Vet reports, that the Bastrop DA's Office would not pursue any criminal charges in this case.
